**FILM-COVERED ELECTRIC DEVICE AND METHOD OF MANUFACTURING THE SAME**

***Detailed Action***

1. The amendments filed on October 7, 2009 were received. Applicants have amended claims 1, 2, 3, 10 and 14 were amended. Claims 1-14 are pending.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in the prior Office action issued on August 8, 2008.

***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher J. Pfister of Sughrue Mion, PLLC on February 1, 2010.

The Abstract on pg. 32 of the application has been amended as follows:

~~The occurrence of micro crack is prevented at the root of a thermally sealed area of casing materials even if a thick electric device element is sealed.~~

The occurrence of micro-crack is prevented at the root of a thermally sealed area of casing materials even if a thick electric device element is sealed. Film covered battery 10 has cell element 13 to which leads 12a, 12b are connected, and casing films 11 for sealing cell element 13 with leads 12a, 12b extended therefrom. Casing films 11 are thermally sealed along the periphery to seal cell element 13. Thermally sealed area 13 of casing films 11 is positioned between both surfaces of cell element 13 in the thickness direction of cell element 13. On a side of casing films 11 from which leads 12a, 12b are not extended, close contact zone 15, in which casing films 11 are not thermally sealed to each other but are in

close contact with each other, is formed continuously to a space which receives cell element 13. Close contact zone 15 has a length of one-half or more of the distance from one end to the other end of an inner edge of thermally sealed area 14.

***Claim Rejections - 35 USC § 112***

4. The rejection of claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, is withdrawn because applicant has identified the portion of the instant specification that supports the recitation made in claims 1 and 10 (see their remarks on p. 7-8).
5. The rejection of claims 1-14 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, is withdrawn because claims 1, 2, 3, 10 and 14 were amended.

***Reasons for Allowance***

6. Claims 1-14 allowed.

The following is a statement of reasons for the indication of allowable subject matter: The invention of independent claims 1 and 10 recite a film covered electric device and a method of manufacturing a film covered device, respectively. The closest prior art of record, Higuchi et al. (US 7,261,971) and Yagata et al. (US 2003/0049527), do not teach that the casing film for an electric device element has a contact zone, between a thermally sealed area and the electric device, where opposing surfaces of the casing film are in contact with each other without being thermally sealed.
